Protocol for Transfer of PTID Barcodes – from Interviewer to the Lab Tech

- Interviewers obtain consent for interview (if no consent, no PTID barcode!)
- Interviewers tear off a set of barcodes (one row)
- Interviewers scan the largest barcode while still attached (do not peel it off!)

CONSENT YES

NO CONSENT (CAPI will alert you if respondent did not consent

- Interviewer finalizes respondent's interview
- Interviewer assigns respondent to a Counselor
- Interviewer send the data (Bluetooth) to the Counselor, AND hands the barcodes to the Counselor

- Interviewer tears off the last barcode (barcode #5)
- Interviewer peels off the 5th barcode sticker, places it onto a "DISCARD" paper
- Interviewer finalizes respondent's interview
- END OF RESPONDENT NO COUNSELOR IS ASSIGNED

- Counselor carries out pre-testing counseling session and assigns respondent to a Lab Tech
- Counselor sends the data (B-tooth) to the Lab
 Tech, AND hands the barcodes to the Lab Tech

CONSENT YES

NO CONSENT

- Lab Tech opens the respondent's data (EA, HH, line number/name)
- Lab Tech scans the barcodes

NOTE: Does the PTID barcode scanned by the Lab Tech match the PTID barcode scanned by the Interviewer? (CAPI system alerts you!). If not, Lab Tech must find the correct PTID barcodes and scan until there is a match.

• Lab Tech may carry out testing!

IF NO LONGER CONSENTING TO BLOOD DRAW:

- Counselor tears off the last barcode (barcode #5), places on a "DISCARD" paper
- Counselor finalizes respondent's interview
- END OF RESPONDENT NO LAB TECH IS ASSIGNED
